Wien, den 13.9.1993

Dear Mirjam,

thank you for your efforts for the "Chain-Animation". I included the invoice to this letter.

The documentation of UNITⁿ consists of a book and a 60 min. videotape. We didn't manage yet to get the money for the translation into english for the book. So I don't know if you would like to have a german copy now or if you want to wait until we have the translations. The german copies cost 150,- ÖS each and the english ones will cost 250,- ÖS. On the Video are excerpts from most of the lectures and works, that were presented at UNITⁿ, for the most part they were in english but some in german too, and we also couldn't afford to translate these into english on the Video. The Video, VHS 60 min., costs 200,- ÖS. Please let us know, what you want, we'll send it to you as soon as possible.

As Herwig told you already, we are going to realise a project similar to UNITⁿ called "UNIT 94" in Berlin next spring. The "Akademie der Künste"(west) offered us to be a part of their project "X94", which is about youth and culture and want's to show every aspect of art, that interests or is produced by young people (15 to 35 years). Of course they thought, that the so-called "Media-Art" shouldn't be missing there, but they have no idea, what it is all about. So they were really glad to hear, that we were planning something like that and invited us to participate. The advantages for us are, that we don't have to deal with sponsors or other money-things like that and can concentrate fully on the contents. The Akademie is a very good adress in Berlin, and they expect more than 100.000 spectators for the whole event. There are also some other places that we will cooperate with, during "UNIT.94", such as the "Kunstwerke" in eastern Berlin, some galleries there, and also the "Stiftung Starke".

In the Akademie we will have one room (400 m2) which will be divided in office (where artists can work on their projects), archive (where people can view a selection of Videos about electronic art and read books, magazines ...) and information terminals, where they can get general or also very detailed information about, what we are doing. In addition to that there will be lectures, performances, exhibitions, experiments ... So if you know anything really special either Videotapes or performances or, that could be interesting for our program please let us know.

Hope to hear from you soon

Christine Meierhofer
