

Dear Heather,

few answers and questions!

Luxury i mentioned not knowing anything about your "squeeze" in terms of accomodation. With accomodation we actually have quite a bit a problem, if it is more then a week or two. Nevertheless it would be possible for the two of you to stay at Herwigs house. For a better planning we would like to know how long you and your squeeze stay? We just did'nt expect so many guests/squeeze's!

If course it's possible for your squeeze to give a lecture about his research ,for such reasons we have MEDIALITY, our up to the minute presentation-platform. Although we would prefer more information about his work/topics.

-) (Out of your "...rather than simply tag along." and "...make a better use of him." - no problem to make him busy for all time !) (-:

I'm still waiting for a fax including your curriculum vitae and ev. a short description of your Lecture and of course the same from your squeeze. so i even could call him by his real name!)

Please fax me also your date of arrival. Especially i'm flying to Hamburg from Feb.4.- Feb.8. to participate at INTERFACE II , a symposium about art and technology, as part of BINARY WINDOW (getting all information to Vienna) and will arrive at Vienna airport Monday Feb.8. at 11.10h .

Two days ago i was talking to Ross.He thinks either to come to UNIT_n or in june to the Ars Electronica. I told him that's maybe better weather in june even we don't have any snow. That changed the same night! Vienna is completly white (20cm) and freezing cold, even the sun is shining.

I enjoyed your laughing on my answering-machine (what a great effect of a map!) and i must say that your faxes arn't as clear as the sea at the southpol(or is it New Zealand?) to me either. I had just been discussing with a friend the Baudrillard-Syndrom and the catch 22 of clear expression, not having time to find it! On the other side i'm surrounded since by the flying doctors, reports from Cocas etc.(to be completed)

After a puzzling and delighting map, a very clear one!

Love

Christoph, cartographer
