Wien, den 11.12.1992
Hello Kit,

thank you for your fax from October. I thought about writing you back for several times, but I was too busy or too lazy. But today I gathered all my strength and now I have the opportunity to invite you for a presentation of your works in Vienna.

From January the 15th to april the 15th our group rented a 250m² room in Vienna ("Projektraum"), to organize presentations, workshops, discussions and an art hard- and softwarefair in cooperation with eight other groups.

One part of the program is the presentation of some international artists and their environment. This means we invite artists to Vienna (flight and hotel paid by us) and ask them to show their own work and the work of their friends and colleagues in a lecture in our "Projektraum" in front of a really interested austrian audience. This should happen between 7th and 14th of march. Kurt and I suggested to invite you for one of these lectures. So if you have time, you should tell us as soon as possible wether you can come or not.

Maybe you could send us some information about your work and how you could imagine a presentation here.

We have a videobeam, 2 monitors, U-Matic player, VHS - player, MsDos - computers, Commodore - computers, maybe Apple - computers, scanner, digitizer, E - mail, Fax.

Pyramedia (Kurt and Ulf) also have their videostudio (U- Matic) in the same building. So you could have a lot of equipment for work. I will send you the german concept for the whole event by mail. You will get the update in english as soon as possible.

Hope to see you soon in Vienna
