Dear Maciej Walczak,

I hope you remember me, talking to you at the World wide video Festival in Den Haag! I liked your Performance very much and I told you about our Idea to install a independent artists research platform in Vienna.

Now we got the chance to realise a 3 Months project in Vienna as a "simulated Workspace" in which Artists present their work and also invite foreign Artists and Theorists to discuss "hot" questions in the Field of new Medias/Technology. I am responsible for "Binary Windows", representing Computeranimation.

We would like to invite you to come to vienna and if possible to create during one or two weeks in this workspace on Amiga 3000 systems one of your Performance with a presentation at the end.

What we can offer you til now ! [Financing is still going on]

- Flight Warschau-Vienna [depends on AUA Destinations]
- A sleeping place in my House [or for a short time Hotel]
- For Work: Amiga 3000, 120Mb, 6Mb Ram

- Sony Beamer -
- P.A. System
- Modem for BBS Networking
- Monitors

Rec

plus a lot of machines from artist and sponsors!

[ I dont know yet if i can organise a Roland D 110, but if you tell me what else you could use [List], I am shure to organise it.]

**Date: From February 8. - Feb. 21. 1993**

The idea is to have a artist like you, which is able to write his own programmms , but not only showing the result at the end. There will be alot of exchange between artists and visitors.

Please write me if your interested with a list of Things you need and how long you could stay [Date] and when possible give me a short call.
